Profile Summary

Enthusiastic and detail-oriented AWS Cloud Computing enthusiast, seeking an internship opportunity to apply practical cloud skills in real-time environments. Hands-on experience in EC2, VPC, IAM, and S3 with strong problem-solving and learning ability. Available immediately for internship roles.

Technical Skills

Cloud: AWS (EC2, S3, VPC, IAM, CloudFront)

OS: Windows Server, Linux Basics

Tools: Git, VS Code, CLI

Basics: Networking, Python (Intro), Shell Scripting

Projects

Private EC2 Server with Secure S3 Access (AWS Project)

- Designed and launched a secure private EC2 instance inside a custom VPC.
- Configured public/private subnets, Internet Gateway, and NAT for controlled access.
- Created IAM Role to allow EC2 to access S3 securely.
- Demonstrated end-to-end cloud infrastructure knowledge including networking, storage, and IAM.

Static Website Hosting on S3 with CloudFront

- Deployed a personal portfolio site on AWS S3 with CloudFront for global distribution.
- Configured custom domain with HTTPS using Route 53 and SSL certificates.
- Applied bucket policies, versioning, and lifecycle rules for static content management.

Education

B.Sc. Information Technology

Swami Dayananda College of Arts & Science - 2022

Additional Information

- Actively upskilling in AWS through self-paced projects and hands-on labs
- Eager to join a startup or tech team as an AWS/Cloud Intern
- Available immediately for remote/in-office internship roles
